

Electricity Supplier Bulletin

Issued on 9 September 2019

Dear Stakeholder,

Welcome to the Electricity Supplier Bulletin from Low Carbon Contracts Company (LCCC) and Electricity Settlement Company (ESC).

This bulletin covers	
New ICP Guidance	Initial Conditions Precedent (ICP) Guidance for Generators now published
Update to IC and FIC Guidance	Version 3 of this Guidance now published
Capacity market update	Suppliers reminded of Metering Assurance tests
LCCC Bulletins	How to subscribe or unsubscribe

New Initial Conditions Precedent (ICP) Guidance

In advance of the results of AR3, LCCC has published on its website the [Initial Conditions Precedent \(ICP\) Guidance](#) to assist new Generators in fulfilling the first requirements under their Contract for Difference (CfD). Failure to fulfil these may give rise to termination. Following the fulfilment of these requirements certain provisions of the CfD become effective. The guidance includes the [Know Your Customer](#) form and the [Legal Opinion](#) template, which are also available as individual downloads.

Update to Installed Capacity (IC) and Final Installed Capacity (FIC) Guidance

LCCC has published on its website an updated [Installed Capacity and Final Installed Capacity Guidance](#) to improve clarity on the topic and on the relevant provisions under the Contract for Difference. This new Version 3 supersedes previous ones.

Capacity Market update

30 August 2019: The EMR Delivery Body has written to suppliers on behalf of the Electricity Settlements Company (ESC) to remind them to continue to make arrangements for the 2019/20 delivery year. This includes making arrangements for testing of meters where necessary. Read the letter [here](#).
