### BEIS loan repaid during Q2 2021

---

Low Carbon Contracts Company (LCCC) is delighted to announce that it has repaid the BEIS loan of £75.1m using the proceeds of the CfD levies received from suppliers in Quarter 2 of 2021 (1 April 2021 to 30 June 2021).

Given the size of the loan, and the first estimate of out-turn demand as 69.4TWh, this equates to an estimated impact of

£1.082/MWh over the quarter. This figure has been communicated to Ofgem for its purposes in relation to setting the price cap for suppliers.

Please note this figure, as with all other figures based on out-turns, is liable to change in future due to expected later inclusion of Green Excluded Electricity and adjustments to settled metering in future quarterly reconciliations.

### Events and webinar recordings

The latest webinar delivered by LCCC's Forecasting team discussed the Interim Levy Rate (ILR) and Total Reserve Amount (TRA) for Q4 2021 (1 October 2021 to 31 December 2021), as well as the outcomes in Q2 2021 and a deep-dive into how the team calculates the TRA.

A recording of the session is available [here](#), while recordings of other previous events hosted by LCCC are also available via LCCC's [Webinars](#) webpage.

All of LCCC's forthcoming events are made available via our [Events](#) webpage.
